

user stories	acceptance criteria
As an investor, I want to see each analyst's accuracy so I can trust their signal.	Scenario: Trusting analysts Given: The investor starts the application Then: The application shows the list of analysts with signals count and success rate
As an employer in a crypto-related company, I want to see my analyst's performance so I can promote or demote them.	Scenario: Analyzing analysts (huh?) Given: The employer starts the application Then: The application shows the list of analysts with signals count and success rate
